

When you eat, they eat!

Web Developer

Overview

Get in before the rocket takes off. TangoTab has developed an innovative social, local, and mobile marketing solution that, for the first time, empowers restaurants to create offers to attract guests to fill their empty tables, risk-free. For the consumer, it is a free service, and every time they dine out through the service, TangoTab feeds a person in need through local food banks and national hunger-related charities. *When you eat, they eat.*

As TangoTab approaches lift-off, we are looking for superstar technical talent that likes to stay on the edge and apply the state-of-the-art when it makes sense. As a Senior Web Developer, you'll be charged with architecting and developing web, social and mobile solutions through innovative modern web-based architectures and technologies.

Responsibilities

Develop, deploy, and maintain a social web site and mobile applications. Work with organization leaders and stakeholders to convert business ideas into technology solutions. Work with progressive technology solutions in a fast-paced start-up space.

Required Technical Skills (direct day to day experience)

- 4 Years experience in modern web development
- Sound understanding of web development principles (web apps, web services, REST, SOAP, dns, etc.)
- Sound understanding high traffic web site implementation (web farm, master-slave, load balancer(s), CDN, etc.)
- Strong understanding of programming principles (SDLC, OOP)
- Agile development principles (user stories, sprint planning, iterative release, continuous development)
- Cloud based LAMP (Apache, NGinx, MySQL, CentOS, Amazon EC2)
- HTML and CSS
- Ruby \Ruby on Rails (devise, cancan, zurb-foundation, Rspec, etc.)
- Capistrano
- MySQL
- GIT or HG
- JavaScript\jQuery
- Java (General Knowledge is OK)
- Python\Django\Tastipie
- PHP

"Nice To Have" Technical Skills (exposure and/or general knowledge)

- Enterprise Java development (J2EE, Apache Tomcat, etc.)
- Mongo DB, Couch DB
- .NET 3.5/[MVC.NET](#) /Entity Framework, LINQ to SQL, Ninject,
- IIS 7
- MS Azure
- MS SQL Server
